

- > **Port size: 1/4" or 3/8"**
(ISO G/PTF)
- > **Excelon design allows in-line installation or modular installation with other Excelon products**
- > **Quick release bayonet bowl**

Technical features

Medium:
Compressed air only

Maximum operating pressure:
Transparent bowls: 10 bar (150 psi)
Metal bowls: 17 bar (250 psi)
Metal bowls with automatic drain: 10 bar (150 psi)

Filter element:
40 or 5 µm

Port size:
G1/4, G3/8, 1/4" or 3/8" PTF

Flow:
28 dm³/s at port size: G1/4
Operating pressure: 6,3 bar (91 psi)
Δp: 0,5 bar (7.2 psi)
Filter element: 40 µm

Drain:
Manual, automatic or semi automatic

Automatic drain operating conditions (float operated):
Bowl pressure required to close drain: > 0,35 bar (5 psi)
Bowl pressure required to open drain: ≤ 0,2 bar (3 psi)
Minimum air flow required to close drain: 0,1 dm³/s (0.2 scfm)
Manual operation: depress pin inside drain outlet to drain bowl

Semi automatic drain operating conditions (pressure operated):
Bowl pressure required to close drain: Greater than 0,1 bar (1.5 psi)
Bowl pressure required to open drain: Less than 0,1 bar (1.5 psig)
Minimum air flow required to close drain: 0,5 dm³/s (1 scfm)

Service life indicator:
Available on request

Ambient/Media temperature:
Transparent bowl:
-34 ... +50°C (-30 ... +125°F)
Metal bowl:
-34 ... +65°C (-30 ... +150°F)
Air supply must be dry enough to avoid ice formation at temperatures below +2°C (+35°F).

Materials:
Body: die cast zinc
Bowl: transparent PC or die cast zinc or transparent with zinc bowl guard
Liquid level indicator lens (metal bowl): transparent PA
Filter element: sintered PP
Elastomers: CR & NBR

Technical data - standard models

Symbol	Port size	Size	Drain	Filter element (µm)	Bowl	Weight (kg)	(lbs)	Model

Warning

These products are intended for use in industrial compressed air systems only. Do not use these products where pressures and temperatures can exceed those listed under »**Technical features/data**«.

Before using these products with fluids other than those specified, for non-industrial applications, life-support systems or other applications not within published specifications, consult IMI Precision Engineering, Norgren Inc.

Through misuse, age, or malfunction, components used in fluid power systems can fail in various modes. The system designer is warned to consider the failure modes of all component parts used in fluid power systems and to provide adequate safeguards to prevent personal injury or damage to equipment in the event of such failure.

System designers must provide a warning to end users in the system instructional manual if protection against a failure mode cannot be adequately provided.

System designers and end users are cautioned to review specific warnings found in instruction sheets packed and shipped with these products.
