

Hermetically Sealed Point Level Switches Actuated By The Magnicator® Float

- Easy installation – Clamps to Magnicator chamber
- Latches to maintain position as the float passes
- Field adjustable
- No contact with process

Jerguson Magnicator gives you the most accurate and dependable electrical interface for point level control or alarm on a Magnetic Level Indicator.

This simple reed switch device can be used as an input to user-supplied controllers or DCS systems. Available with either SPDT or DPDT action, the RS-2 and RS-2/2 are designed to give years of trouble-free service.

Model RS-2 or RS-2/2 Reed Switch

- Hermetically Sealed Bi-Stable Latching Reed Switch
- Maximum 1 Amp, Current Load @ 150 VAC/VDC, 25W Max
- Completely Sealed – Never has to be opened or exposed to the environment
- UL/CUL approved for service in Class I, Division 1 Groups B, C, & D; Class II, Division 1 Groups E, F, & G Hazardous Locations
