

AMRH RAINHOOD

Enhanced Protection for Field Instruments & Enclosures

AMRH Rainhoods provide an additional layer of protection for field instruments, transmitters, and enclosures exposed to harsh environmental conditions. They are designed to help shield equipment from **heavy rainfall, direct sunlight, and demanding tropical environments.**

Standard Models :

- AMRH-2033S610
- AMRH-5020S610
- AMRH-RTGS610
- AMRH-TKHUBS610

KEY FEATURES

01

Protection from Sun & Rain

Protect equipment from direct sunlight and rain.

02

Hemmed Edge

Flat-folded hem edge for enhanced strength and safety, with no sharp edges.

03

Corrosion Resistance Stainless Steel Material

Manufactured from SS316L stainless steel.

04

Standards Compliance

Meets the recommendations of MS2694:2018, Clause A2.2.

AMRH APPLICATION EXAMPLES

Stainless steel rainhoods engineered to
protect field instruments and control
boxes in tropical and offshore
environments.
